

Sprint Planning Report

Sprint Number & Dates

This is sprint number 1 and it is scheduled from 15.01.2026 to 29.01.2026

Sprint Goal

The main goal for the first sprint is to get the project started by initializing the project platforms like Trello and GitHub. In Trello, we will write some amount of user stories, and set story points to them. The initial project backlog will also be created.

This sprint will also include writing initial documentation for the project plan and vision respectively.

Selected Product Backlog Items

A goal for Sprint 1 is to create a backlog for the project which means that we do not have all the backlog items to choose from yet. An important backlog item for sprint 1 is creating the project backlog.

Planned Tasks / Breakdown

We have planned to execute the following tasks:

- Populate the project backlog
- Choose the technology stack
- Set up Trello
- Write a Project Planning and Vision report
- Setup a Github repository
- Start designing a Figma user interface (optional, if time permits)

Team Capacity & Assumptions

The whole team is present, healthy and feeling well so by all assumptions we will get each task done in time.

Definition of Done

- **Github**
A repository is created and all team members are part of it.
- **Trello**

The workspace is configured and boards are created. All Sprint 1 tasks are completed.

- **Tech Stack Selection**

The technology stack is selected.

- **Project Backlog**

The backlog is populated with a minimum amount of items.

- **Planning and Vision report**

The documents are written and spell-checked from all team members.

- **User Stories**

User stories are created from main functionality and points added to them.
