

Sprint Review Report

Scrum master. **Teemu Laasio**

Sprint Goal

The main goal for the first sprint was to get the project started by initializing the project platforms like Trello and GitHub. In Trello, we wrote a number of user stories, and set story points to them. The initial project backlog at the top level was also created.

The sprint included writing initial documentation for the project plan and vision respectively.

Completed Tasks

The following Sprint 1 tasks were completed:

- **Project Planning** document.
- **Project Vision** document.
- **Figma** user interface wireframe.
- **Trello** setup which includes, project backlog, sprints boards and user stories.
- **Github** repository.

What Went Well

The scheduling for Sprint 1 went well. We returned and submitted each assignment and deliverable in time and we also managed to complete the optional task of designing the application user interface using Figma. In addition to the timeliness we are satisfied with the quality of our work so far and we believe that we have succeeded in doing thorough planning for the project.

What Could Be Improved

One thing that we could improve is to spread the work timing even more evenly. For some of the assignments we did a big portion of the work during the last day before the deadline. By spreading out the workload even more evenly we could reduce stress and pressure on the members and further improve the quality of our work.

Next Sprint Focus

The next sprint will focus on the technical start of the product. This includes planning and initializing the database, starting the user interface development as well as configuring DevOps environment tools like JaCoCo for code coverage reports.

Work Distribution

The following table defines the tasks, and time spent executing them for each team member.

Member	Tasks	Time Spent (h)
Aleksi Putkonen	Project Plan & Vision, Trello, Sprint Planning, GitHub setup	21
Blendı Grajqevci	Project Plan & Vision, Trello, Sprint Planning, Figma	20,5
Teemu Laasio	Project Plan & Vision, Trello, Sprint Planning	22
Alabbas Al'krshany	Project Plan & Vision, Trello, Sprint Planning	20
